

Precision Resources, a division of the Trimarc Group, Inc., is currently seeking a highly organized and results-driven IT Project Manager to over and manage multiple IT projects from initiation to completion.

This is a contract-to-permanent position with a growing organization.

Position Summary:

The IT Project Manager will be responsible for leading cross-functional teams, ensuring projects are delivered on time, within scope, and within budget. This role requires a strategic thinker with strong leadership skills, excellent communication abilities, and technical understanding to bridge the gap between technical teams and business stakeholders.

Essential Duties and Responsibilities:

Project Planning and Execution:

- Define project scope, goals, and deliverables in collaboration with stakeholders.
- Develop detailed project plans, including schedules, resources, and budgets.
- Manage all phases of the project lifecycle, including initiation, planning, execution, monitoring, and closing.

Team Leadership and Collaboration:

- Lead cross-functional teams of engineers, developers, analysts, and other IT professionals.
- Foster collaboration among team members and promote a positive team environment.
- Ensure roles and responsibilities are clearly defined and provide guidance and support to team members.

Stakeholder Management:

- Act as the main point of contact between stakeholders and the project team.
- Regularly communicate project updates, progress, risks, and changes to all stakeholders.
- Facilitate discussions to ensure alignment between business and IT objectives.

Risk and Issue Management:

- Proactively identify and manage project risks, issues, and dependencies.
- Develop mitigation strategies to ensure project success.
- Ensure timely resolution of project blockers and challenges.

Budget and Resource Management:

- Monitor project budgets, resource allocation, and ensure efficient utilization of resources.
- Track and report on project financials, ensuring alignment with project goals.
- Manage third-party vendors and contractors as necessary.

Quality Assurance:

- Ensure that all project deliverables meet quality standards and client expectations.
- Perform regular project reviews to assess progress and ensure compliance with organizational policies and best practices.

Documentation and Reporting:

- Maintain comprehensive project documentation, including project plans, risk logs, status reports, and lessons learned.
- Provide regular project reports and updates to senior management and stakeholders.

Qualified candidates must have a US Citizenship or Green Card.

Candidates requiring sponsorship or C2C candidates will not be considered
